My solution to this issue without VBA is testing each format only the year part : A1: has the today function B1: has the english format for years value text a1;"yyyy" C1: has the spanish format for years value text a1;"aaaa" One of the cells B1 or C1 would throw an error so I can get the language being used. Microsoft Office applications may be obtained individually; this includes Microsoft VisioMicrosoft Project and Microsoft SharePoint Designer which Excel 2013 (French Edition) not included in any of the twelve editions. Provides an efficient way to search for any part of a function's name in both languages selected.

ClickRuntostarttheinstallationimmediately. All Reviews:. Hi I am a subscriber but haven't managed to find a suitable function to separate out a cell that contains a foreign language from the English translation.
