In a third study, Cerda analyzes the effects of taxes on
investment decisions of firms for Chile, also using a panel
data methodology, though from a sample of firms. Nelson and
recognized that there are important interactions between
capital formation, labour allocation, technical progress and
productivity.

Nelson, C. The structure of production and the derived demand for inputs in Ca
We assume that she wishes to achieve the smoothest possible
path of consumption over her lifetime. This is because all
endogenous variables in VAR are affected by any other
endogenous variables with time-lag. According to this table,
an increase in the growth rate of government expenditure
raises wage share and has a positive effect on the domestic
demand terms; however, it has a negative effect on export
growth. Continue shopping. Per-Olov Johansson.
